DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to a digital camera with pre-processing and format processing appropriate for recording, classified in class 348, subclass 222.1.
 - II. Claims 17-34, drawn to a digital camera with white balance adjustment, classified in class 348, subclass 223.1.
 - III. Claim 35-39, drawn to a digital camera with two modes, classified in class 348, subclass 220.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a digital camera, which performs white balance. Invention III has separate utility such as a digital camera with a still image mode and a monitoring mode. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
